## Response

Air Result method will return you list of airline contracts and can be identified by unique number which is called ContractId, which can be used in every request after results.

BookingKey :- This is very important parameter, which is the identity of request and response, every search result contains unique Bookingkey, this BookingKey must be sent with next request after AirResult, as this BookingKey is only associated for Search,Sell and Booking purpose. AirResult method will return unique BookingKey.
